February 27, 2017

Attn: Shawn Peterson

Shawn,

I would like to thank you for the excellent repaving and grading project your crew and company completed for us back in November of 2016 at our office location. Your quotation was far below the your competitors and included regrading areas for proper drainage the competitor took exception to and as default include. The total cost came in within budget for the over 4000 sq.ft. of grading and paving provided. The regrading and the surface preparation work proved correct with the heavy rainfall we experienced in the past several months. All surface water now flows to the street or to the storm drains, without any puddles left behind.

Thank you for providing us with a quality end result and completing the project quickly and efficiently. You are welcome to use the letter as a referral on future projects.

Robert S. Brose
